

## 應外系大學部 93級校友 周季嬋 (周大頭)

大學四年不知道畢業後的目標，所以覺得至少把眼前的英日文把握好，還有養成對周遭環境、食物、人的觀察力。沒事就運動、去圖書館翻翻各種書、旁聽有興趣的課程、旅行。現在回想起來，多多少少都有變成一路走來的優勢，身體與大腦是龐大的記憶體，多做多學不會吃虧。工作之後有更多需要學習的事情，隨時都在面對困難和解題進入下一階段，對比出大學四年的悠閒。一期一會，錯過的不會再回來，至今不時在心中提醒著自己。

“ After graduating from university, if you do not know your goal, at least grasp English and Japanese well and develop the observation ability on the surrounding environment, food, or people. Do sports, go to the library to read all kinds of books, attend interesting classes, and travel. Now in retrospect, more or less all have become the advantage along our way. Our body and brain are a huge memory stick, as more work and learning will not be lost.

There are more things to learn after you start to work, and I am always facing difficulties and solving problems to enter the next stage, which contrasts with the leisurely four years in university. Now and then in my heart I remind myself, “one time a meeting, a miss will not come back.”
